JOEL SAUCEDO
FRONT-END WEB DEVELOPER

✉ joelcmk@gmail.com 📍 Austin, TX 📱 970-331-2807 🌐 joelsaucedo.com

OBJECTIVE

I am an analytical, creative and detail-oriented professional seeking a position as a front-end developer. I am looking to work for a company working on an engaging, useful product while promoting innovation and entrepreneurship.

RECENT PROJECTS

MyFlix: Film database
- Fullstack app: React + Node.js + JWT + Mongodb + Heroku
- Built a Restful API from scratch that allows the user to create/delete an account, add movies to favorites, it has a list of movies with their title, description, genre, and director's name.
- Features:
    - Create and delete user profile
    - Browse, add and remove movies from list of favorites
    - Shows user description of the movie, genre and director

Meetup: Find events in your city
- Frontend app: React + AWS Lambda + Meetup API
- Features:
    - User is able to find local events from anywhere around the world
    - Each event has a description, date, time and a graph that shows how many people are attending
    - Displays a graph that indicates how many events are happening on a given day by location

EXPERIENCE

Austin, TX
March 2020 – Present

Accenture
Content Moderator
- Met client satisfaction and expectations by receiving and applying constructive feedback
- Assure that users are safe on the platform by removing unwanted content that violates community guidelines
- Adapt to a fast-changing environment with new technologies, policies, and trends
- Regularly attend meetings regarding company updates and new technologies

Avon, CO
September 2014 – November 2018

Westin Hotels
Hospitality
- Communicated updates daily to coworkers and accordingly allocated and distributed work assignments
- Supervised the overall activity of eight team members to assure customer satisfaction
- Resolved customer cases by consulting with other Westin Hotel departments

EDUCATION

Online
2019 – 2020

CareerFoundry
Certificate in Full Stack Development
- Completed an intensive, self-paced program that emphasized technologies required by the expanding tech industry
- Utilized a support network of mentors and tutors to monitor the progress and assure that the program was being successfully completed
